SPECIFICATION AMENDMENTS

Please replace the paragraph beginning on page 4 line 22 with the following replacement paragraph, in which no new matter has been added.

As shown in FIG. 3, a winch 50 having cables connected to each of the segments is energized to extend all of the segments simultaneously. The winch is situated on the outside of the outermost tower segment 29 above a lower end cap thereof. A first or main cable 52 winds off the winch 50 through a guide mechanism 54, around a pulley 56 situated on the side of tower segment 29, over a pulley 58 situated on an upper end cap of the segment 29, down and around a pulley 60 on a lower end cap of the segment 27, back up and around a pulley 62 on the upper end cap of the segment 29, back down and around a pulley 64 on the lower end cap of the segment 27, up and around a pulley 66 on the upper end cap of the segment 29, and finally down to an anchor point 68 on the lower end cap of the segment 27.
